However, webpages are an important part of any business and for a photographer's website. Most photographers provide some type of online presence, be it a website, a social networking site, an online portfolio, or a blog. Creating webpages and sites involves more than installing Adobe Dreamweaver, a program that enables you to create a web page. You also need to understand not only how to use Dreamweaver to create a web page but how to apply the best practices and guidelines for making your web page work best for your target audience. This chapter shows you how to effectively create a website from scratch or modify a website that someone else has created. Ideally, your web page will include * A photography section that allows you to upload your photos (or a link to where you can do this) and link to the photographer's website. * Navigation that links to other pages, including contact information and links to social networking sites. * An About page that contains important information

about you and your website. * A Copyright page that lets people know they are on your site and under copyright.

Q: MS Access SQL Query- Find many duplicate records I have a MS Access table that contains a variety of information, including a couple columns with application-related tracking codes. When these application codes are input, a record is created with a value of 1 for the field called "TrackingCode" and a 0 for the other fields. What I'd like to be able to do is find records that are duplicates for the TrackingCode column. I'm not much of a SQL person, so any help at all is greatly appreciated. A: You might be able to do it with an aggregate function. For example, lets say you wanted to count the number of records where the first six characters were the same. This can be done like so: `SELECT First(Substring(Field1, 1, 6)) + IIF(Len(Substring(Field1, 1, 6))>0,0,1) FROM Table1;` The ISNULL() function is used here because the above query will only give back the number of unique records. /* Copyright 2014 The Kubernetes Authors. Q: Understanding numbers with an inverted triangle symbol Below is an image I found in an old magazine (Funny Animals Pics Vol 1, No 5, 1986), and I'm having trouble figuring out what the numbers on the bottom right represent. A: Is a traslation of this: Four is equal to 4^4 Three is equal to 4^3 Two is equal to 4^2 One is equal to 4^1 And this past Sunday, she joined them as they became the new fighters in the "WWE Universe." Before WWE drafted her to the main roster, the opportunity to become the RAW Women's Champion presented itself to her for the first time. As the SmackDown Tag Team Champions squaring off against The Rock and John Cena, she and Alicia Fox were in line for a title shot, which would have occurred after Team Cena dropped the Tag Titles to The Wyatt Family. The Miz would later attack Cena, disqualifying the Team Cention leader and revealing himself as the leader of The Wyatt Family, after their attack on the Raw Women's Champion. She explained that the future is still somewhat unknown, but she's excited for what lies ahead. "Well, I've always dreamt of being part of the world of WWE and not just for a little bit, but for my entire life," Bayley said. "So, there's never been a moment I haven't wanted to be a part of WWE. I've wanted to be in WWE since I was a little kid. "So, I think this is going to be a really fun time. I'm excited. I'm really excited to see where this road leads me in the world of WWE. I'm excited to see what the future holds for me." It's clear that Bayley is a girl who likes to be challenged, which is why she chose to team with Charlotte for the SmackDown Tag Team Titles against Becky Lynch and Dana Brooke on the October 14 edition of SmackDown. Even though she's somewhat new to the game, she has earned the right to challenge for the title. The only thing the former Smack
