I'm searching for help on how to replace the BIOS serial number (HEX) in an HP EliteBook 8570w. I've searched the HP forums, but they're not helpful, since I'm not asking how to replace the BIOS, but how to display the old BIOS in case I do not have the original. Anyone know how to change the BIOS serial number? To change the serial number in Windows: Click Start, Control Panel, Hardware and Sound, Sound, Audio Hardware, Double-click the Universal Serial Bus Controllers. Double-click the device for your HP laptop. In the details box, select, and click Disable. To replace the BIOS, run a diagnostic test on your laptop. HP DesignJet C4500 - How to install a new memory module? Hey All,I have a HP DesignJet C4500 and have been having a problem with the printer not printing after an upgrade.I downloaded the Windows 7 HP Driver and it said that my printer needed an upgrade. The upgraded all went well, but after the reboot I could not print anything. I downloaded the HP DesignJet C4500 Driver and tried to install it (successfully) but I can not print anything. It comes up as an error (the printer appears to be on and prints fine when it's plugged in). I have tried re-installing the driver and even downloaded and re-installed the Windows 7 HP Driver, but the printer does not work. I am out of ideas. Please, could someone help me? Hi Everyone, I have a HP Deskjet 4650 and have been having a problem with the printer not printing after an upgrade.I downloaded the Windows 7 HP Driver and it said that my printer needed an upgrade. The upgraded all went well, but after the reboot I could not print anything. I downloaded the HP DesignJet C4500 Driver and tried to install it (successfully) but I can not print anything. It comes up as an error (the printer appears to be on and prints fine when it's plugged in). A:Error Message - Printer not printing Hello, Have you tried a different cable? Take the printer out of the box and plug 82157476af
